RE: Fax and eCW

71% of practices on eCW still process faxes manually, 1-2+ hours a day per provider your team will never get back.

Osmia connects your fax line directly to eCW. Every incoming fax is read, classified, and matched to the right patient record in one click.

A Florida practice cut fax processing from 2 hours to 15 minutes a day.

Worth a 10-minute call?
